

How an enquiry actually gets handled: IKONIK and OasisEye, side by side

You asked to see how your chat compares to OasisEye's. We ran both ourselves, as a patient rather than as an agency, and asked each of them the same ordinary questions.

Prepared by Toggle Solutions for IKONIK Eye Specialist Centre · 4 August 2026

The first thing we noticed

OasisEye has a chat on their website. IKONIK has none.

A visitor on ikonik-eyecentre.com has three ways to make contact: a phone number, an email address, and a form. There is no chat widget and no WhatsApp link anywhere on the site. Someone reading about LASIK at 10pm has nothing to tap.

So the first gap is not about quality. It is about presence. They are in the conversation and you are not.

The same questions, both clinics

IKONIK, on WhatsApp

One session, 4:14pm to 4:21pm

PATIENT · 4:14PM

Assalamualaikum, Hi! I want eye treatment

IKONIK · 4:14PM

Salam Sejahtera 😊 Terima kasih kerana menghubungi IKONIK Eye Specialist Centre. Adakah anda:
[Pesakit Baru] [Pesakit Sedia Ada]

PATIENT · 4:15PM

can you speak in english?

IKONIK · 4:15PM

Salam Sejahtera 😊 Terima kasih kerana menghubungi IKONIK Eye Specialist Centre. Adakah anda:
[Pesakit Baru] [Pesakit Sedia Ada]

The identical message, sent a second time.

PATIENT · 4:16PM

Taps through: Pesakit Baru, then Bebas Rabun (LASIK), then Continue

IKONIK · 4:18PM

This message can't be displayed here. Please open WhatsApp on your phone to view the message.

The flow does not load on a laptop.

IKONIK · 4:21PM

Ya, Zaid, boleh saya bantu?

A person, 7 minutes in. No price was given at any point.

OasisEye, on their website

One session, 9:20am to 9:26am

OASISEYE · 9:20AM

Thank you for contacting OasisEye Specialists! Feel free to call or WhatsApp us at +603 2730 7666 to speak with us directly.

The opening message points the patient to another channel.

PATIENT · 9:20AM

I would like to book an appointment

OASISEYE · 9:20AM

Sure, I'd be happy to help you with that. Could you please provide the following details for the appointment registration? Full name · Contact number · Age · Gender · Preferred branch · Doctor to consult · Reason for visit / eye condition · Preferred date and time

Eight fields at once, including which doctor the patient wants to see.

PATIENT · 9:21AM

Can you speak in BM?

PATIENT · 9:21AM

Hello?

PATIENT · 9:22AM

Price?

Three messages, no reply in the four minutes we kept watching.

OASISEYE · 9:24AM

Thank you for contacting OasisEye Specialists! Feel free to call or WhatsApp us at +603 2730 7666 to speak with us directly.

The same opening message, word for word, four minutes later.

PATIENT · 9:25AM

Can you give a price list?

No reply before our capture ends.

Neither chat answered the question the patient asked twice.

In the two sessions we ran, neither clinic gave a price. Yours is promoting RM2,500 per eye on TikTok and in the website popup, so the answer exists inside the business. It is just not reachable from the channel the ads point at.

Both chats also sent the same canned message a second time rather than responding to what the patient had just written.

Side by side

One observed session per clinic, on the times shown above. Where we did not test something, it is left out rather than guessed at.

WHAT THE PATIENT DOES	IKONIK TODAY	OASISEYE TODAY	WHAT WE WOULD BUILD
Finds a chat on the website	● None No chat and no WhatsApp link on the site	● Yes Chat widget on every page	● Planned WhatsApp agent is written now, the website widget is a build step
Types a question instead of tapping	● No Button menus only, the typed English message went unanswered	● Uneven Answered the first message quickly, then three in a row went unanswered	● Yes Reads full sentences every time
Asks for another language	● No Asked in English, received the same Malay message twice	● No "Can you speak in BM?" went unanswered in the session	● Yes Malay, English and Chinese, switching mid conversation
Asks the price	● No price Seven minutes, four taps, a person, and still no figure	● No price Asked twice, unanswered in the session	● Yes, pending sign-off From a fixed list you approve, once the promo is confirmed current and price disclosure is cleared under KKLIU
Uses a laptop	● No The flow fails to load on desktop	● Yes It is a website widget	● Yes No dependency on the phone app

WHAT THE PATIENT DOES	IKONIK TODAY	OASISEYE TODAY	WHAT WE WOULD BUILD
Gets a useful reply	● 7 minutes Reached a person, but with none of the questions answered	● Uneven Immediate at first, then four minutes of silence	● Seconds Answers first, then hands over to your team
Arrives from an ad	● Not recorded A booking currently cannot be traced back to the ad that produced it	● Not tested	● Yes, once connected The ad is recorded automatically once the click-to-WhatsApp integration is wired up

What OasisEye gets right

The format is the right one

Their replies are written in full sentences and read like a person. There are no button menus and no "choose option 1 or 2." Next to a rigid template, it feels like talking to a clinic, and patients respond to that.

If that is what you like about their chat, we agree with you.

It did not hold up for six minutes

In the session we captured, three patient messages went unanswered for about four minutes, and the same automated greeting fired a second time. The price question was asked twice and not answered.

We cannot tell from the outside which parts of their chat are automated and which are a person typing. What we can see is what the patient experienced.

The opportunity is to take the format they got right and make it hold.

A patient should get that same natural conversation, and get it at 2am, in the language they wrote in, with prices you have approved. That is the gap between the two columns, and neither clinic has closed it yet.

What we would do first

01 Put a chat on the website

There is none today, which is the clearest gap against OasisEye. The same agent answers on WhatsApp, so both channels behave identically.

02 Load the answers you approve

Prices, procedures, hours, and what each technology covers. The agent cannot invent a figure or offer a discount, including under pressure from a patient.

03 Set the urgent-symptom rules

A defined list of red flags leaves the booking flow and goes straight to a person. This one needs a decision from you about who receives them and how quickly, because routing urgent cases into an unwatched inbox would be worse than not routing them at all.

04 Connect the ads to the record

Once click-to-WhatsApp is wired up, every enquiry carries the ad that produced it, so spend can be pointed at whatever is actually booking patients.

We have already written the agent, in Malay, English and Chinese, including the clinical triage rules. We would rather show it to you working than describe it.

Toggle Solutions · Your Digital Growth Partner · toggle.solutions · hello@toggle.solutions

Based on one observed session per clinic, at the times shown. Transcripts are reproduced from screen captures taken during those sessions and are trimmed for length, not edited for wording. The two chats run on different channels: OasisEye's on their website, IKONIK's on WhatsApp. The proposed agent is designed and written but not yet deployed, and several items in it need your confirmation before it could be.
