Google Search — Bidding & KPI Targets

Match bidding strategy to data maturity. Don't ask automation to optimise on signals it doesn't have.

Bidding Strategy

Phase 1: Cold Launch (Wk 1–3)

Maximize Clicks

Brand + generic India. Build conversion volume before letting the algorithm bid on goals.

Phase 2: Conversion Learning (Wk 4–8)

Maximize Conversions

Switch India + Pakistan to Max Conversions once each campaign stabilizes. Brand stays on Manual CPC.

Phase 3: Efficiency Scaling (Wk 9+)

Target CPA

Lock in target CPA per campaign once 30+ conversions accumulated. Pakistan remain on Max Clicks until volume warrants the switch.

Lead Form Strategy

Conditional Meta Instant Forms: qualify the lead inside the ad, save sales time downstream.

Instant Form — Question Logic

Q1 — Which professional body are you interested in?

ACCA · ICAEW · I'm not sure yet

Q2 — What is your current status?

Working Professional · Fresh Graduate · Final-Year Student

Q3 — Preferred study mode?

100% Online (Flexible) · Blended · On-Campus (Malaysia)

Q4 — Which level are you starting at?

Professional Level · Foundation (FIA / CFAB) · Subject-specific

Auto-filled

Full Name · Email · Phone · City / Country

Why conditional logic wins

01

Lead quality score before sales sees it

Every lead arrives in CRM pre-tagged by qualification, status, mode, and level. Sales team prioritises Working Professional + Professional Level first.

02

Routing without manual triage

ACCA Professional Level leads → senior advisor. Foundation leads → onboarding specialist. "Not sure yet" → nurture sequence.

03

Drop-off telemetry feeds creative

Form abandonment by question tells us which message-audience pairing is mismatched. We rewrite the creative or the targeting, not just the form.

04

Conversions API marries it to outcomes

Each form fill is matched back through CRM enrolment events, training Meta's algorithm to find leads that actually pay tuition — not just submit forms.

KPIs & Measurement

Channel ROI proxy — the only number
that matters

Reporting: live dashboard (daily) + written read-out (weekly) + strategic review (monthly)

The Lead-Quality Loop

Most agencies stop at form submit. We connect Conversions API to your CRM so the algorithm learns who actually enrolls.

Result: CPL stops being a vanity number. We optimise to cost-per-enrolment from week 6 onward.
