

ICMS

Advertising Plan

TikTok, Facebook and Instagram, and Google Search | Three budget options | 22 August 2026

Where the account stands today

A lead means one person who fills in your form or messages you.

RM3,137

Spent in 30 days

On Google ads alone, between 23 July and 21 August 2026.

0

Leads recorded

Google shows nobody filling in a form from that money.

1 of 8

Courses running ads

Only Enforcement Management runs. Football Studies is switched off by a blocked word.

0

Extra links on your ads

No extra links, no call button, and no WhatsApp button anywhere on your site.

One missing line of code causes all of it. Your tracking code fires on every page but never on a finished form, because the form sends the enquiry without moving the visitor to a new page. So one setting counts 732 page views as enquiries, and the three meant to count real ones sit at zero.

Two weeks of fixing before we spend big

Every plan starts the same way. Nothing scales until an enquiry can be traced from click to inbox.

WEEK 1

Make the counter work

- Add the line of code that tells Google someone finished your form
- Send people to a short thank you page after they send it, so Facebook and Google both see it
- Delete the three broken settings and the one that counts page views
- Stop counting map taps on your Google business listing as enquiries

WEEK 2

Give the click somewhere to land

- Fix the Apply Now link, which has pointed at a February 2026 seminar page for six months
- Build one Malay page per main course, with the form near the top
- Add a WhatsApp button so people can message instead of filling a form
- Agree one list of intake dates, because your site and your ads give five different answers

WEEK 3 ONWARD

Then the spending starts

- Full budget goes live once we have watched one test enquiry reach your inbox
- Week 6 review against the cost per lead limits in this deck
- Anything 50 percent over its limit gets switched off

Weeks 1 and 2 run at a quarter of whichever budget you pick.

The order we advertise your courses in

The order we fund the courses you named.

Football and Sports

Football Studies · Sports Science · Exercise Science

Paid
first

- RM2.13 an enquiry on Facebook, about a third of your other courses
- Nobody else is buying these words on Google
- Your account blocks it today with a paused word and a banned word

Enforcement and Policing

Enforcement Management · Policing & Investigation · Bachelor in Law Enforcement

Paid
second

- The only course running today. 1 in 10 people who see the ad click it
- RM7.00 an enquiry on Facebook
- One phrase, law enforcement course malaysia, brought every enquiry the account has recorded

Business, Tech and Postgraduate

Business Administration · Computer Science · Applied AI · MBA · Master in Management · DBA

Paid
third

- Higher fees per student, longer to decide
- Funded from the RM12,000 plan upward
- Computer Science and Applied AI wait for the lab upgrade

Football and Enforcement are funded in every plan. Business, Tech and Postgraduate start at RM12,000.

Three platforms, three different jobs

Google Search is the smallest line in every plan. It only reaches people already searching. TikTok and Facebook reach people before they start looking.

Meta Facebook and Instagram

Its job: steady enquiries at a predictable price, plus repeat ads to people who already visited.

- In-app forms with two questions that filter out time wasters
- A button that opens WhatsApp instead of a form
- The only platform where you already know your cost per enquiry

TikTok

Its job: reach school leavers and football fans before they search, and fix how ICMS looks while doing it.

- Where 17 to 22 year olds spend their time
- Football and campus clips suit the app, so production stays cheap
- Doubles as the branding repair, paid for as advertising

Google Search

Its job: catch people typing your course name, protect your own name, and appear against Unikop.

- Closest to signing up, so more of them enrol
- Also the most expensive, about RM3.96 a click today
- Volume is capped by how many people search, so a bigger budget buys back the vague searches that already failed

Your account was shown 10,996 times in 30 days across 80 search words. That is the ceiling we priced to.

The three plans side by side

Monthly ad spend. Lead numbers are the sum of slides 7 to 9. Student numbers use your own figure of 2 to 3 sign-ups per 100 enquiries.

Monthly ad spend	Meta	TikTok	Google	Leads a month	Average per lead	Students a month	Ad cost per student
Plan A · RM6,000	RM2,400	RM2,400	RM1,200	727	RM8.25	15 to 22	RM273 to RM400
Plan B · RM12,000	RM4,800	RM4,200	RM3,000	966	RM12.42	19 to 29	RM414 to RM632
Plan C · RM20,000	RM8,000	RM6,000	RM6,000	1,180	RM16.95	24 to 35	RM571 to RM833

Why each enquiry costs more as the budget grows

Your RM2.13 football enquiry came from about RM100 a day. Spend ten times that and the same people see your ad far more often, so Facebook charges more for each extra thousand reached. The plans price that in.

What stays the same in all three

The two week fixing period, the price limit per enquiry, the weekly check on search words and videos, and the switch-off rule. The plans differ only in how many courses they carry and how fast they reach your target.

Plan A · Prove it works

RM6,000 a month

Two courses only. Establishes the real cost of an enquiry once the counting works.

Meta 40%

TikTok 40%

Google Search 20%

■ Meta RM2,400 ■ TikTok RM2,400 ■ Google Search RM1,200

Where the money goes	Each month	Max per lead	Leads
Meta · Football	RM1,000	RM8	125
Meta · Enforcement	RM1,000	RM8	125
Meta · Repeat visitors	RM400	RM8	50
TikTok · Football	RM1,400	RM6	233
TikTok · Enforcement	RM1,000	RM6	167
Google · Your own name	RM240	RM44	5
Google · Enforcement	RM480	RM44	11
Google · Football	RM480	RM44	11
Total	RM6,000	RM8.25	727

727

Leads a month

The eight lines on the left, added up.

15 to 22

Students a month

Using your own 2 to 3 in 100 sign-up rate.

What this plan leaves out

- Business Administration, Computer Science and Applied AI get nothing
- No MBA or Master in Management ads
- No ads against Unikop searches
- No overseas ads, so Bangladesh, Pakistan and China stay with your agents
- At 180 to 264 students a year, this plan does not reach 300

Plan B · Build it out

RM12,000 a month

Adds Business Administration, your own name on Google, and rival college searches.

Meta 40%

TikTok 35%

Google Search 25%

■ Meta RM4,800 ■ TikTok RM4,200 ■ Google Search RM3,000

Where the money goes	Each month	Max per lead	Leads
Meta · Football	RM1,700	RM11	155
Meta · Enforcement	RM1,500	RM11	136
Meta · Business Admin	RM800	RM11	73
Meta · Repeat visitors	RM800	RM11	72
TikTok · Football	RM2,000	RM9	222
TikTok · Enforcement	RM1,400	RM9	156
TikTok · Business Admin	RM800	RM9	89
Google · Your own name	RM450	RM48	9
Google · Enforcement & Policing	RM900	RM48	19
Google · Football & Sports	RM900	RM48	19
Google · Business Admin	RM450	RM48	9
Google · Rival colleges	RM300	RM48	7
Total	RM12,000	RM12.42	966

966

Leads a month

The twelve lines on the left, added up.

19 to 29

Students a month

Using your own 2 to 3 in 100 sign-up rate.

What RM12,000 adds over RM6,000

- Business Administration advertised on all three platforms
- Ads on your own name, replacing the RM4.69 a click you pay now for ICMS searches
- Your ad appears against Unikop, Unicom, SEGI and UNITAR
- Enough Facebook budget to chase people who visited and left

At 228 to 348 students a year, this plan reaches 300 only if 3 in 100 enquiries sign up.

Plan C · Reach the target

RM20,000 a month

Covers every course you named, including the MBA and doctorate, and starts advertising overseas.

Meta 40%

TikTok 30%

Google Search 30%

■ Meta RM8,000 ■ TikTok RM6,000 ■ Google Search RM6,000

Where the money goes	Each month	Max per lead	Leads
Meta · Football	RM2,400	RM14	171
Meta · Enforcement	RM2,000	RM14	143
Meta · Business Admin	RM1,200	RM14	86
Meta · MBA and doctorate	RM1,200	RM14	86
Meta · Repeat visitors	RM1,200	RM14	85
TikTok · Football	RM2,400	RM12	200
TikTok · Enforcement	RM1,600	RM12	133
TikTok · Business Admin	RM1,000	RM12	83
TikTok · Campus life	RM1,000	RM12	84
Google · Your own name	RM600	RM55	11
Google · Enforcement & Policing	RM1,400	RM55	25
Google · Football & Sports	RM1,400	RM55	25
Google · Business & Tech	RM900	RM55	17
Google · MBA and doctorate	RM1,000	RM55	18
Google · Rival colleges	RM700	RM55	13
Total	RM20,000	RM16.95	1,180

1,180

Leads a month

The fifteen lines on the left, added up.

24 to 35

Students a month

Using your own 2 to 3 in 100 sign-up rate.

What RM20,000 adds over RM12,000

- MBA, Master in Management and doctorate on Facebook and Google
- A campus life series on TikTok, the image repair paid for as advertising
- Computer Science and Applied AI join the Google list
- Room to test Bangladesh, Pakistan and the Gulf without cutting Malaysia

At 288 to 420 students a year, this is the only plan that passes 300 across most of its range.

Which plan gets you to 600 students

Target is about 600 students this year. Around 150 have signed up and agents bring a share of the rest, leaving roughly 300 for advertising.

Plan	Each month	Students a month	Students a year	Ad spend a year	Ad cost per student	Does it reach 300?
Plan A	RM6,000	15 to 22	180 to 264	RM72,000	RM273 to RM400	No. It falls short at both ends.
Plan B	RM12,000	19 to 29	228 to 348	RM144,000	RM414 to RM632	Only if 3 in 100 enquiries sign up.
Plan C	RM20,000	24 to 35	288 to 420	RM240,000	RM571 to RM833	Yes, across most of the range.

4%

What the ads cost, next to one student's fees

Worst case in the biggest plan is RM833 of advertising against a diploma priced near the RM21,000 PTPTN limit.

The change that beats a bigger budget

At 4 sign-ups per 100 enquiries instead of 2, you need half the advertising for the same 300 students. A system that tracks enquiries, a call-back rule and a WhatsApp button all beat anything we could change in the ads. Slide 14 lists them.

What would make these numbers wrong

- The counting never gets fixed, so none of this is measurable
- Fewer than 2 in 100 enquiries sign up, which we will see by week 6
- Fewer people search for these courses than the account suggests
- Your team cannot handle 30 calls a day at Plan C volume

Where every cost per lead comes from

Three numbers are yours, one is an industry average, one is worked out from your click cost.

Platform	What you told us	What we planned on	Why we planned higher
Meta · Football	RM2.13 per enquiry	RM8 to RM14	Came from about RM100 a day. At Plan C the same people see the ad far more often, and Facebook charges more per extra thousand reached.
Meta · Enforcement	RM7.00 per enquiry	RM8 to RM14	The most realistic of your three figures. Treated as the floor.
Meta · Overseas	RM19.00 per enquiry	Plan C only	Kept out of the Malaysian average.
TikTok	Not running yet	RM6 to RM12	You have no TikTok figures yet. Malaysian education average, replaced with your real numbers by week 6.
Google Search	Nothing measurable	RM44 to RM55	RM3.96 a click today. At 9 form fills per 100 landings that is RM44 an enquiry. Today nobody fills it in, because they land on a contact page with the form near the bottom.

These are limits, not forecasts. Anything 50 percent over for two weeks running gets switched off and the money moved.

What the ads will say

Your ads promise low fees, PTPTN and online study. Your website shows no fee, never mentions PTPTN on the course page, and offers no online option. The promise gets fixed before we pay for the click.

THE MAIN MESSAGE

Register for RM300, not RM1,900. The only Football Studies diploma in Southeast Asia, and an intake that does not make you wait until next year.

The RM300 fee is already true and appears nowhere on your site. The football claim is your own, from your homepage. The intake line needs one decision from you.

TikTok

- Titans FC training and match clips, shot upright on a phone
- Students talking, one course per video, Malay first
- Money behind your best unpaid posts before paying for new videos
- Six new openings a month, dropped below 1 click per 100 viewers

Meta

- In-app forms asking which course and how they plan to pay
- A WhatsApp button for people who will not fill in a form
- Swipeable cards on what jobs the course leads to
- Follow-up ads based on the course page someone viewed

Google Search

- Two ads per group instead of one, so we can see which wins
- Six extra links, four short claims and a call button per campaign
- Malay pages for Malay searches, which the account lacks today
- The RM300 fee in a headline

How you will know it is working

The figures we hold ourselves to, and when you see them.

Weekly

Search words and videos

Block wasted searches, drop videos nobody watches, move money between courses.

Week 6

First full review

What each enquiry cost, next to every limit printed on slide 11.

Monthly

Enquiries that became students

Decides whether the budget is right. You tell us who signed up.

Quarterly

Which courses to keep

Which courses earn their budget, which get dropped, which get added.

When we switch something off, agreed now

- Any platform 50 percent over its cost limit for two weeks running
- Any ad under 1 click per 100 viewers after 5,000 views
- Any course signing up at under half the average rate, reviewed quarterly

What we will not put in a report

How often an ad was shown, Google's optimisation score, and any enquiry count that includes page views or map taps. Your account counts 732 of those a month.

What we need from you

Six things. The first three unblock the advertising. The last three are not billable and matter more.

1 Full access to the accounts

Editing rights on Google Ads, plus your Facebook and TikTok business accounts. We hold view-only access from 18 August and cannot change a setting.

2 Half a day of your web developer

To add the code that tells Google someone finished your form, and to build a thank you page. Without it every number here is guesswork.

3 One list of intake dates

Your course pages say January, May and September. Your Apply Now page sells a March 2026 intake. Your ads say July and August. You told us it is monthly. We need one answer before any ad runs.

4 Permission to publish your fees

RM300 to register against Unikop's RM1,900. It appears nowhere on your site or in any ad.

5 Someone who owns the enquiries

Enquiries land in a shared spreadsheet with no tracking and no call-back rule. Plan C means about 40 a day. Name the owner and set a call-back time.

6 A WhatsApp business number

Your team said people click WhatsApp and give up on forms. There is no WhatsApp link anywhere on icms.edu.my today.

What it costs

Ad money goes straight to the platforms at cost. Our fee is separate and covers planning, build, creative, weekly work and reporting.

Line	Plan A	Plan B	Plan C	Notes
Ad money, paid to the platforms	RM6,000	RM12,000	RM20,000	Platform invoices shared in full every month.
Toggle fee	RM (to be confirmed)	RM (to be confirmed)	RM (to be confirmed)	To be confirmed by Toggle before this is issued.
Ad money in months 1 and 2	RM1,500	RM3,000	RM5,000	The fixing period runs at a quarter of the budget.
Shortest commitment	3 months	3 months	6 months	The week 6 review needs a third month behind it.

Included in our fee

- Rebuilding all three accounts, including tearing down the current Google setup
- Writing the tracking instructions and checking them with your developer
- Direction and copy for all three platforms, in Malay and English
- Weekly work on the accounts, monthly numbers, and a course review every quarter

Quoted separately

- Rebuilding your website
- Filming and photography on campus
- Choosing and setting up a system to track enquiries
- Search rankings work

Thank you

First three jobs: fix the counting, unblock football, repair the Apply Now link.
